SUMMARY OF INFORMATION

During this session, I first felt that I was inside the missile. There was a box the inside the missile that was pushed out.

I then could see a young military man driving a van. The young man was driving toward a military security gate. Inside the van was tape from the missile but not this package that was lost or dropped. The young military man did not know this.

When I went looking for the data package, I could see a large tree. The tree was had a large thick trunk and it was a tall tree with green leaves. I could first see a man bending over looking at something on the ground and then put it back. He looked Oriental and he was dressed in Oriental clothing.

Then I saw two women drive up in a car and one woman got out of the car and walked up to the tree and picked something up off the ground and put it in her purse. This woman had a coat on so it could have been cool or cold at this area. This woman did not look Oriental. It seemed as though she knew why she was coming to this area and she went straight for the package.
